

Providing customized payroll services nationwide for over twenty-five years.

CASE STUDY

Pyramid Staffing
The Power of People

“After interviewing four payroll providers, I chose to work with The Payroll Factory because they gave me a really comfortable feeling that things would be taken care of and I wasn’t just a number.”

Tony Trolio, Founder
of Pyramid Staffing

Situation:

Prior to working with The Payroll Factory, Pyramid Staffing was a franchisee in which a franchisor handled the back office function of payroll.

Pyramid Staffing became independent from the franchisor and needed to find a payroll company that would customize a payroll program to fit their unique needs.

Challenges and Solutions:

Our biggest challenge was finding a payroll company that would work with us and develop a system for paying multiple pay rates per person. We wanted to send a weekly spreadsheet outlining the pay rate by employee and make sure our payroll company verified those people are paid the correct amount specified without assuming that persons pay rate is the same from week to week.

SOLUTION: The Payroll Factory processes payroll for Pyramid Staffing via custom a spreadsheet. Each of The Payroll Factory’s client services representative is trained to run specific developed checks and balances to ensure all paychecks for Pyramid Staffing employees are correct.

“From day one to present, the system (The Payroll Factory implemented) has worked and we have been very happy from the very start.”
